TECHNICAL SKILLS

Programming Languages: C#, Python, CSS, HTML, JavaScript, Java, TypeScript

Technologies: ASP.NET, FastAPI, Node.js, React, Express.js, Django, Flask, LangChain, Next.js

Databases and OS: Linux, MySQL, SQL Server, NoSQL (MongoDB)

CI/CD, Cloud and Others: Azure DevOps, AWS (EC2, S3, CloudFront), Docker, Nginx, RESTful APIs

WORK EXPERIENCE

Software Engineer

September 2024 - Present

TUV SUD America

Remote

- Developed a chatbot for GRC Connect using Python, FastAPI, OpenAI, and RAG, cutting manual data retrieval time by 80% and enabling real-time access to trends and summaries across business units.
- Owned end-to-end delivery of chatbot features by managing architecture, implementation, and deployment across multi-region clients; adopted feedback to increase accuracy and user satisfaction.
- Improved fire and risk inspection data accuracy by 15% by building a .NET and SQL Server-based web application to import and validate hundreds of data records monthly.
- Created custom components and dynamic report templates for the SMARTS App, increasing audit throughput by 35% and helping field teams reduce report prep time by 50%.

Software Developer, Intern

June 2023 – Aug 2023

Parker Hannifin

Buffalo, New York

- Reduced operational costs by 12% by building a .NET Core and React app to automate user manual printing.
- Fine-tuned an internal helpdesk Meta LLaMA chatbot with Meta LLaMA to handle IT and HR-related queries.
- Optimised SQL Server queries to cut latency by 800ms and shared performance insights to improve database efficiency.
- Used customer feedback to design features, integrating into UI/UX updates of the customer service portal.

Software Engineer, Intern

Mar 2022 – May 2022

Cyient

Hyderabad, India

- Reduced project scheduling conflicts by 10% by building an internal resource allocation app with React.js and Node.js.
- Decreased page loading times from 2 to 1.5 seconds by debugging code for a customer healthcare application in a pair-programming setup.

PROJECTS

DelishDish - A Recipe App | *Python, Django, React, AWS, Gunicorn*

July 2024

[GitHub](#)

- Designed and deployed a full-stack recipe platform for South Indian cuisine using Django REST Framework and React.
- Configured Gunicorn and Nginx for production deployment on AWS EC2, with media storage handled via AWS S3.

ConvoNest – a Threads Clone | *Next.js, TypeScript, MongoDB, TailwindCSS*

June 2024 - Aug 2024

[Live Link](#)

- Developed a responsive web app with community features using Next.js, TypeScript, MongoDB and TailwindCSS.
- Implemented authentication with Clerk, added real-time updates and server-side rendering for optimized performance.

DONS 365 – Purdue Marketplace | *MongoDB, Express.js, Node.js, React.js, AWS*

Sept 2022 – Dec 2022

[GitHub](#)

- Created a centralized student marketplace enabling secure listings, communication, and transactions.
- Designed UI components with React and Figma, and built a RESTful API backend with Node.js and Express.
- Deployed the system on AWS EC2 with static assets hosted on S3; implemented unit and integration testing with Jest and Cypress for high test coverage.

EDUCATION

Purdue University Fort Wayne

Indiana, USA

Master of Science in Computer Science

May 2024

Dayananda Sagar College of Engineering

Bangalore, India

Bachelor of Engineering in Computer Science

May 2022
